

Middle 1 – What we have been up to – Spring Term 3

This term Middle 1 have enjoyed doing lots of science experiments. Students work on predicting what will happen and then discuss the results after completing the experiment.

We have investigated materials for different purposes. We made rockets that had to be transparent and waterproof.

After watching the 'Up' film we looked at South America. We made 'Snipe' birds out of different materials. Students had to explain why they had chosen their material and how it would help the bird.
